Fourth Quarter 2010 Segment Results and Outlook

- Roger Fix – President & Chief Executive Officer

Statements in this presentation include, or may be based upon, management's current expectations, estimates and/or projections about Standex's markets and industries. These statements are forward-looking statements within the meaning of The Private Securities Litigation Reform Act of 1995. Actual results may materially differ from those indicated by such forward-looking statements as a result of certain risks, uncertainties and assumptions that are difficult to predict. Among the factors that could cause actual results to differ are uncertainty in conditions in the financial and banking markets, general domestic and international economy including more specifically increases in raw material costs, the ability to substitute less expensive alternative raw materials, the heavy construction vehicle market, the new residential construction market, reduced capital spending by customers, successful expansion and automation of manufacturing capabilities and diversification efforts in emerging markets, the ability to achieve cost savings through lean manufacturing and low cost sourcing, effective completion of plant consolidations and the other factors discussed in the Annual Report of Standex on Form 10-K for the fiscal year ending June 30, 2009, which is on file with the Securities and Exchange Commission, and any subsequent periodic reports filed by the company with the Securities and Exchange Commission. In addition, any forward-looking statements represent management's estimates only as of the day made and should not be relied upon as representing management's estimates as of any subsequent date. While the company may elect to update forward-looking statements at some point in the future, the company and management specifically disclaim any obligation to do so, even if management's estimates change.
